

IOT 1st Assignment

Every Team/Project to submit a scope of work document for IOT device/product which will include the following:

1. Project's name

2. List of participants

3. Product description: short brief of the product to demonstrate accurately and clearly what is the product and what it's intended use.

4. Product SOW and deliverables: The characteristics of the products, services, and/or results/functionalities/features your project will produce.

5. Acceptance criteria: The conditions that must be met before project deliverables are accepted for successful launch. The Product's MVP (Minimum Viable Product).

7. Hardware Requirements: list of electronic parts, the IOT device you are intending to develop is composed of – connectivity type (BT, SIM, WIFI etc..), list of inputs (what are you measuring), list of actuators (which enable physical movement). Project member/s can and should write the exact HW requirements they need for the project.

GOOD LUCK!
